

disability together

Departmental Group for Disabilities and LSD

Who we are

The Veterinary Sciences Department supports and assists all present and prospective students in difficult situations in their study path due to disabilities or specific learning disorders (LSD).

In order to facilitate and assist the students during their university career, the Departmental Group for Disabilities and LSD has been established, which includes:

Prof. **Francesca** Pedonese

(Departmental Referent for students with disabilities and LSD and Coordinator of the Group)

Prof. **Giovanni** Barsotti

Prof. **Elisabetta** Giannessi

Dr. **Lorella** Giuliotti

Dr. **Fabio** Macchioni

Prof. **Giovanna** Preziuso

Our target

All students of the Department and future students with disabilities, even temporary, or LSD. More generally, all students who need support to overcome problems related to personal conditions of discomfort.

Activities of the Departmental Group for Disabilities and LSD

We facilitate awareness of the specific University services for students with disabilities and with LSD (USID, Sportello DSA) and in general for students (Listening and Counseling Service), and we are in constant contact with them.

We represent a link between students and the University services, when there is no direct contact with them.

We are available in the area of orientation for individual interviews with prospective students with disabilities or with LSD who are interested in our degree programs.

We are available for individual interviews with students with disabilities or with LSD of our Degree Courses regarding specific situations in order to identify the best solutions for each problem, also interfacing with the teachers.

Contacts

Contact us at this email address to report your problem:

supportodisabilita@vet.unipi.it

Our email address is also available for reports about architectural barriers or other problems from students, academic and support staff.
